

**Crawford County
Economic Development Partnership, Inc.**

**INVEST IN THE ECONOMIC FUTURE OF
CRAWFORD COUNTY**

The Crawford County Economic Development Partnership (CCEDP) is a new public/private not-for-profit corporation formed to enhance the economic conditions of this county of 45,000. State and local government financial support combined with a private fund raising drive now underway will support our mission.

A programmatic approach to systemic change in Crawford County is critical. With a new first-time-ever county-wide approach to economic development in place, we are collaborating to stem the tide in population, job-base and earnings decline.

We are an emerging organization in a county with great needs, challenged to reverse years of decline. Our needs are fundamental. Population, job and earnings stability is the result we seek most.

Our organization's priorities are:

- Support retention and expansion of existing businesses.
- Development of a local quality workforce.
- Attraction of new business and industry.
- Support the development of high growth entrepreneurs.
